BerryAlloc High-Tech Laminate

Universal

High Pressure Surface
Best Loc® X-Treme

BerryAlloc High-Tech Laminate is the world's strongest and most durable laminate floor. Combining beautiful aesthetics and exceptional technical performance, BerryAlloc High-Tech Laminate is suitable for use in high-traffic areas such as hotels, restaurants, shops, offices and yes, even airport terminals. Its unique high pressure surface offers customers a floor with guaranteed long-term performance and outstanding resistance to water, wear, fading and stains. BerryAlloc's High-Tech Laminate Universal comes with our extra strong Best Loc® X-Treme locking system. These unique qualities, together with a wide choice of colours in a variety of surface finishes, make BerryAlloc High-Tech Laminate the floor of choice worldwide.

BerryAlloc also offers you wonderful laminate for residential use, wall panels for use in kitchens and bathrooms, a complete parquet flooring range and extraordinary click vinyl flooring, each with accompanying accessories.

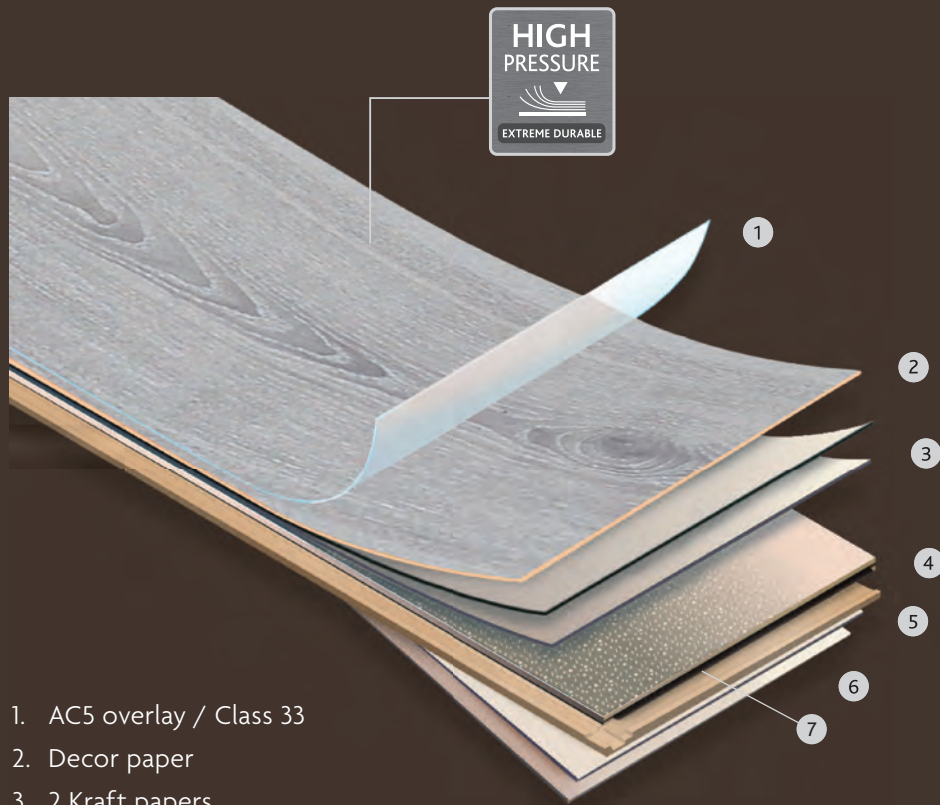

Thanks to our excellent quality, our innovative range and exceptional service, the BerryAlloc Group has grown into an international player and highly rated interior and decoration specialist for both residential and commercial projects.

BerryAlloc is about providing you with the best of the best in a greener and more sustainable way. This particular passion influences both our philosophy and our actions. You can find more information about the full BerryAlloc product range at www.berryalloc.com

1. AC5 overlay / Class 33
2. Decor paper
3. 2 Kraft papers
4. AquaResist HDF board
5. Impregnated edges
6. Counterbalance paper
7. Best Loc® X-Treme

Lifetime Warranty

We are so convinced about the quality of our laminate that we are pleased to include a lifetime warranty for residential installations of BerryAlloc High-Tech Laminate. In commercial installations we offer an eight-year warranty on our Universal collection.

Water and moisture resistant

The core material of BerryAlloc High-Tech Laminate is our unique AquaResist HDF board which reduces moisture absorption to an absolute minimum. The edges of our planks are sealed to prevent moisture penetration.

Top quality manufacture

BerryAlloc High-Tech Laminate is manufactured in accordance with internationally approved standards. The strong and durable top layer is pressed separately before being glued to the core material. This process creates a plank which is stronger than conventional laminate floors on the market, enabling the surface to resist extreme wear and tear.

Colour and Design for any site

In addition to its unsurpassed lock strength, the floor also has to be aesthetically pleasing - especially if it is going to last as long as BerryAlloc High-Tech Laminate. Our High-Tech Laminate range includes more than 100 colours and a variety of surface finishes to suit any preference. In addition to the standard formats we also offer planks which are extra wide or narrow.

BerryAlloc takes the environment seriously

This is shown in the choice of raw materials, partners, transportation and manufacturing processes. Our selection of raw materials is made based on a combination of our customers' requirements for product quality and demands for minimal environmental impact. Suppliers are chosen based on their ability to live up to our way of thinking. We also set a requirement that our providers evolve in the same direction and that they are certified in accordance with ISO 14001. Our High-Tech Laminate is made of natural and synthetic materials.

Extra Strong

Suitable for lots of people

BerryAlloc's Universal range is extremely durable thanks to its high pressure surface. Its Class 33 rating ensures much higher wear and impact resistances than other laminate floors. It can also withstand moisture, most acids and alkaline solutions, lit cigarettes and high-impact blows without additional treatment. It is also very resistant to scratches, especially in high traffic areas.

Super Fast Installation

Work less, enjoy more

Save 30% on the time needed to install your laminate floor, courtesy of our ultra-strong Best Loc® X-Treme locking system. Installing a Universal floor is a cinch and it will add beauty and elegance to your interior.

Wherever. Forever.

Wherever. Forever.

Aqua-resistant

Guaranteed to stay dry

Are you looking for a floor that can stand up to wet and dirty shoes, splashes, kitchen accidents or other mishaps? BerryAlloc High-Tech Laminate offers protection in two ways:

Our AquaResist HDF board is the core of our laminate planks. Thanks to the manufacturing process, the board reduces absorption of moisture to an absolute minimum.

The edges of the board are also impregnated with a special compound which is designed to resist moisture penetration.

For Professional Environments

Anti-static, allergy-free

BerryAlloc High-Tech Laminate gives your office a level of sophistication and comfort that cannot be found in other laminate floors. All BerryAlloc High-Tech Laminate floors are anti-static, which means that they do not attract dust or dirt. This is a significant advantage in offices with PCs and IT equipment. Static electricity is directed through the floor without creating static discharges. This is vital for areas with high traffic and sensitive electronic equipment.
